

Letter Statement for Genuine Temporary Entrant(GTE) Requirement

The reason I am applying for student visa is that am willing to study in University of Queensland(UQ) as a study abroad student. I received the Confirmation of Enrollment(CoE) from UQ.

Studying in Australia is a big chance to me. Especially, UQ is well-known as high quality education. Therefore, I am looking forward to learn the culture of Australia and upgrade my knowledge in my major, computer science engineering. Also, studying in UQ for a semester will be a proof of being a person who is prepared for international works. And this will lead to my dream, which is working at a IT corporation out of Korea after I graduate Chungnam National University. I am sure that the classes I take in UQ will have higher quality than Chungnam National University. I believe that spending a half year in Australia will make me a positive experience for my future.

While spending in Australia, I will get financial support from my parents. Also, I am receiving scholarship from Chungnam National University to cover my tuition during 1semester.

When the semester ends, I have to return to Korea and continue the courses in Chungnam National University to finish the course to receive bachelor's degree.

Currently, I am a senior student in Chungnam National University. I have been taking a year off from school, and after the second semester of Chungnam National University ends, I can apply for a return to school, so I will go to Australia after returning to school. My major is Computer Science Engineering. I am going to graduate 2024 Feb. So it would be a honor to study my last year of university in Australia.

Also, I attached the certificate of birth in Korean just in case. The certificate of the family relationship is the only document can be issued in English because the department said that the document contains all information that usually needs when submitting documents in other countries.

Sincerely,
Hyeyeon Lee.
